

Virtual Reality Safety Simulation & Training *Enterprise*

For Any Industry Save **time**. Save **money**. Stay **safe**. Have **fun**.

- **Scenarios**

- Confined Space
- Fall Protection
- Lock Out Tag Out
- Fire Suppression
- AED
- CPR
- Virus Vision

- **Hardware Upgrades**

- **Software Upgrades**
- **Customer Support**

People learn by doing. Virtual environments provide a safe, immersive and engaging experience where students learn behavior-based safety.

Full Suite of Training Products for Industrial Scenarios

Benefits of Virtual Reality Training

Including VR in your training courses may sound a little too far-fetched, especially if you're new to it. Taking the leap from traditional training programs, to immersive learning can be a big change for many educators. We are here to help you define your training goals, and find the best solutions to achieve them.

1. Increases learner engagement
2. Increases retention rate
3. Helps learners gain proficiency faster
4. Improves employee performance
5. Reduces costs
6. Allows learners to practice in a safe environment

Successful programs should combine classroom and hands-on instructional elements.

Contact us to try our virtual reality training solutions firsthand.

Confined Spaces

- Appropriate communication
- Controlling hazards
- Equipment for safe entry
- Detection of hazardous conditions
- Monitoring
- Supervisor responsibilities
- Attendant responsibilities... *and much more!*

Fall Protection

- PPE and proper fall protection equipment
- Harness and Lanyard inspection
- Connectors and Anchor points
- Working at heights
- Lifts and ladders
- Scaffold navigation
- Work environment hazards

Lockout, Tagout

- Identification and shutting down of equipment
- Notify affected employees
- Proper shut down of equipment
- Disconnect primary energy sources
- Address secondary sources
- Verify lockout
- Service equipment
- Bring equipment back on-line

Fire Suppression

- Seeing a fire and pulling a fire alarm
- Reaching for a fire extinguisher
- Pulling the pin
- Squeezing the trigger
- Using the PASS system (Pull, Aim, Squeeze, & Sweep)
- Maintain proper distance from the fire
- Know when to move away from a fire
- Check pressure gauges
- Refine their technique and retry if they fail

AED

- Recognize sudden cardiac arrest and call for help
- Work closely with someone performing
- CPR Provide defibrillation with AED until help arrives

CPR

- Perform initial protocols and check for breathing
- Send someone for help and ask them to call 911
- Perform compressions with proper technique

Virus Vision

Learn how to prevent the transmission of germs in the workplace through proper infection prevention protocols.

- Visualize transmission of germs via air and surfaces
- Recognize potential sources of infection transmission vectors
- Keep productivity losses low by preventing infections
